Healthcare Services

Healthcare Services

Introduction

Interra Information Technologies service offerings help clients to maintain, enhance and transform their IT systems to adapt the dynamics of market demands. Using highly matured domain expertise tightly coupled with technology, InterraIT's accelerated implementation framework help healthcare clients build their businesses.

Our Services

Consumer Driven Healthcare services

InterraIT is engaged with payers to integrate CDHCs with the core managed care systems. Interra Information Technologies IT offerings include Application development, Application enhancement, UAT/Post Release support and Maintenance of Health Savings Accounts (HSA), Health Reimbursement Arrangements (HRA) and Flexi Spending Accounts.

Managed Care Systems Implementation and Support

InterraIT's expertise to provide IT services in Managed Care Systems to healthcare clients, and thus helping members to provide comprehensive health services and offer financial incentives in the form of lower out-of-pocket costs to patients who use doctors participating in a network.

eHealth and Portals

InterraIT has wide eHealth and portal expertise in healthcare. Our experienced domains experts help healthcare clients by choosing right technologies and methodologies that are key to deliver best-of-breed solutions. Our services are extended by effectively engaging us in creating, enhancing, and maintaining our clients member portal, provider portal, EDI Management and similar other areas. Our service extends up to the integration with external systems, such as, Customer Relationship Management and Data Warehousing systems.

Legacy Support

InterraIT has extremely knowledgeable domain capability in IBM/Mainframe and HP OpenVMS platforms that are hosting key healthcare functionalities, such as, claims, membership, provider, billing, eligibility, capitation, and medical management. Our experience in Legacy includes wide exposure in migration, re-engineering and modernization services.

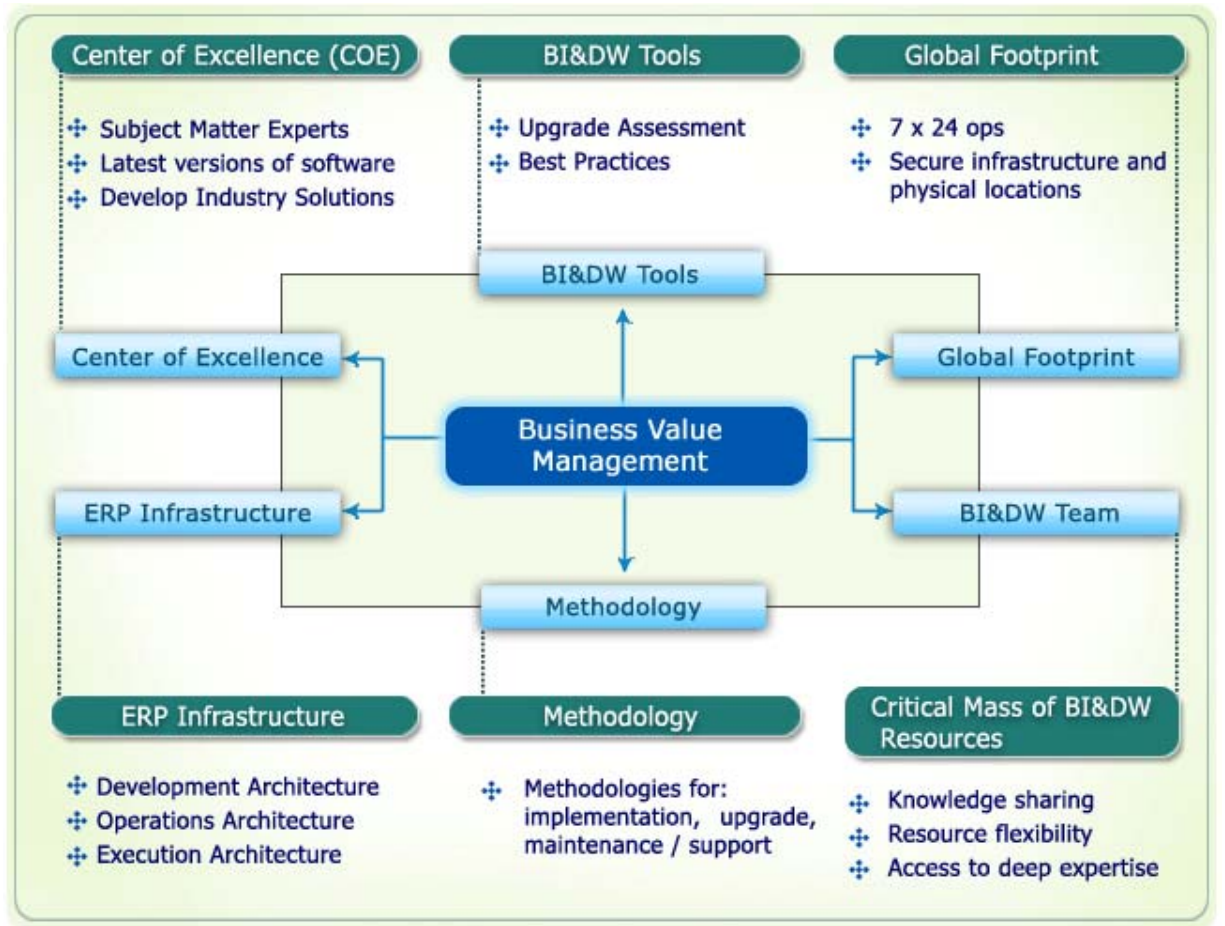

ETL Data Warehouse, Reporting and Data Analytics

InterraIT has highly trained domain specialists who are focusing ETL/DW, BI and Analytics for healthcare needs.

Our services covers

- a) Data acquisition & transformation,
- b) Data warehouse (data storage and maintenance,
- c) Business intelligence.

Our experience extends in different healthcare function/subject areas in claims, member, premium, provider, provider contract, encounters, customer, purchaser, Rx claims, and Capitation.

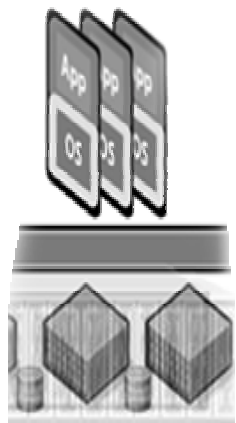

Compliance Services

InterraIT has deep knowledge to provide customizable HIPAA compliance solutions and frameworks. We provide implementation and support to our healthcare clients to establish HIPAA compliance with trading partners. Our deep understanding of real time transactions, such as, 270/271, 276/277, 278 request/response, 835, and batch transactions, such as, 837 Institutional and 837 professional, helps our client interact with the trading partners following the compliance norms. Our services extend managing multiple platforms, root cause analysis & issue resolution, compliance testing, follow strict staging and security policies.

- ❖ **ICD-10 Services** – InterraIT is completely geared up to provide transition support to International Statistical Classification of Diseases (ICD-10) through our consulting, providing solutions, and implement under our healthcare client's guidance, and support. Our offer extends ICD-9 clinical modification code sets to the new set, and the recommended date of compliance is October 1st 2013.
- ❖ **HIPAA transition from 4010 to 5010** - Centers for Medicare and Medicaid Services of the Department of Health and Human Services released its final version of the HIPAA 5010 transaction definitions. To effectively make the transition from HIPAA 4010 to 5010 InterraIT is prepared to provide all services, starting from upgrading HIPAA EDI packages, add-on tools for EDI packages, testing framework for seamless migration, and professional services.

About InterraIT

InterraIT has been a leader in the information technology industry since its founding in 1996. The company is a global software services organization that delivers innovative business & technology solutions to Fortune 1000 companies. Accredited at SEI-CMM Level 5 and an ISO 9001-2000 certified organization; it has been listed as one of India's Top 20 Best Employers by IDC-DQ Best Employers Survey 2006!

Headquartered in San Jose, InterraIT's operations are spread across 5 countries, with a sales network spanning the United States, Canada, United Kingdom, India and Japan. The company has two state of the art development centers in Noida and Kolkatta, India, which are a focal point in servicing its customers across the globe.

Today, InterraIT is the largest privately held offshore consulting company with operations in India. The company offers a comprehensive portfolio of IT and IT-enabled services with a distinct focus on providing product engineering services, ERP solutions and web-based custom enterprise applications. Having worked with customers from varied industries in the last 10 yrs, the company consciously aligned itself with specific industry verticals which include Telecom, Healthcare, Retail, Financial Services, Logistics and Independent Software Vendors (ISV). This has helped InterraIT in developing tremendous domain knowledge and subject matter expertise resulting in delivering innovative solutions and enhanced business value for its customers.
