DQ - IDC survey places InterralT among top 20 employers within software & services industry

San Jose (CA) & New Delhi, India September 13, 2006

InterralT has joined the ranks of India's Top 20 Best Employers as a result of the DQ-IDC best employers survey 2006! A detailed survey on employee satisfaction, jointly conducted by India's most respected IT magazine - Dataquest and global research firm - IDC has placed the company among the premier 20 employers within the IT software and services industry in India.

The accolade has come at a time that has coincided with the tenth anniversary of InterralT. Addressing the employees in a function to celebrate the company's tenth anniversary, the President & Managing Director, Asoke Laha, commented "Today, we can proudly say that we belong to an organization that is providing a healthy work environment, great growth opportunities and a work-life balance, to keep us motivated, energized and in the pink of career comfort. In the past, we elected not to participate in such surveys, as we wanted to stay focused on building the organization. Establishing a world-class Sales Organization was one of our key objectives, and we have accomplished it. Around 12 months ago, we embarked on a mission to transform your InterralT into 'the preferred destination of knowledge workers'. This year, we decided to participate in the survey. Given the fact that we participated in this exercise for the very first time, our inclusion among the top rankers, is indeed a laudable achievement. Not only are we in august company standing shoulder to shoulder with industry stalwarts and the Who's Who of the IT software industry, we are also ahead of a number of other organizations that are known names among the ICT fraternity."

Speaking on the occasion, Laha further adds, " Over the last one year, we launched a few initiatives to improve our HR systems. Clearly, we have covered significant ground in nurturing talent and putting in place effective HR strategies and best practices. Even so, more needs to be done. **Accolades such as the DQ-IDC survey, are just the beginning - the tip of the iceberg!** There are many more goals we need to accomplish and many more peaks we need to scale. Having joined the exclusive group of IT companies that are keeping their employees satisfied, we need to and we must move up the ladder over the next few years. **We believe, there is room at the top and we need to be there.** "
