InterralT bags order from World's leading vendor of Enterprise CMS

San Jose (CA), Oakbrook Terrace (IL) & New Delhi, India May 15, 2006

One of the world's leading vendor of Enterprise Content Management software has tied up with Interra Information Technologies Inc.(InterralT) to outsource IT services related work towards development, support & maintenance of its Web services & content management needs.

Commenting on reasons to opt for InterralT as its software development partner, the CEO of the CMS company said **" Even beyond the functional expertise of the team we interacted with, we were impressed by InterralT's emphasis on people & processes. They have an intense focus on people, which is so essential to ensure quality service. This, for us, translated into an excellent understanding across the board and we truly look forward to this association."**

The New York based company, one of the first to realize the true potential of on-demand web services, is InterralT's latest addition to its growing portfolio of web services clients. Web Services solutions from InterralT address many recurrent business process challenges of its customers. These range from information delivery between applications within disparate environments to enabling cost-effective reuse of existing technology assets.

Speaking on the occasion, Ranjan Guha, President - North America Operations of InterralT said **"This new engagement is an endorsement of our capabilities in delivering high quality Content Management and [Web Services Solutions](#) through our methodologies and I-QT framework. As we are into long term strategic relationship with most of our clients, we are confident of delivering real business value to our latest client, and look forward to take this alliance further."**

InterralT has already established an ODC to provide all development, design, testing related support to the client. The InterralT offshore team based out of Noida in India shall be responsible for initial environment set up to provide all design, development, testing & maintenance support to the New York based company. In addition, services shall also be extended to one of the service providers of the client – a pioneering integrated solution provider on web services network platform.
