Project Overview

Project aims at outsourcing the management services and at the same time retain control over cost, tracking and billing.

About The Client

The Client is a leading global distributor of industrial and specialty chemicals, with an extensive network of over 260 distribution facilities in North America, Europe, Asia-Pacific, and Latin America, and additional sales offices in Eastern Europe, the Middle East, and Africa

Case Survey

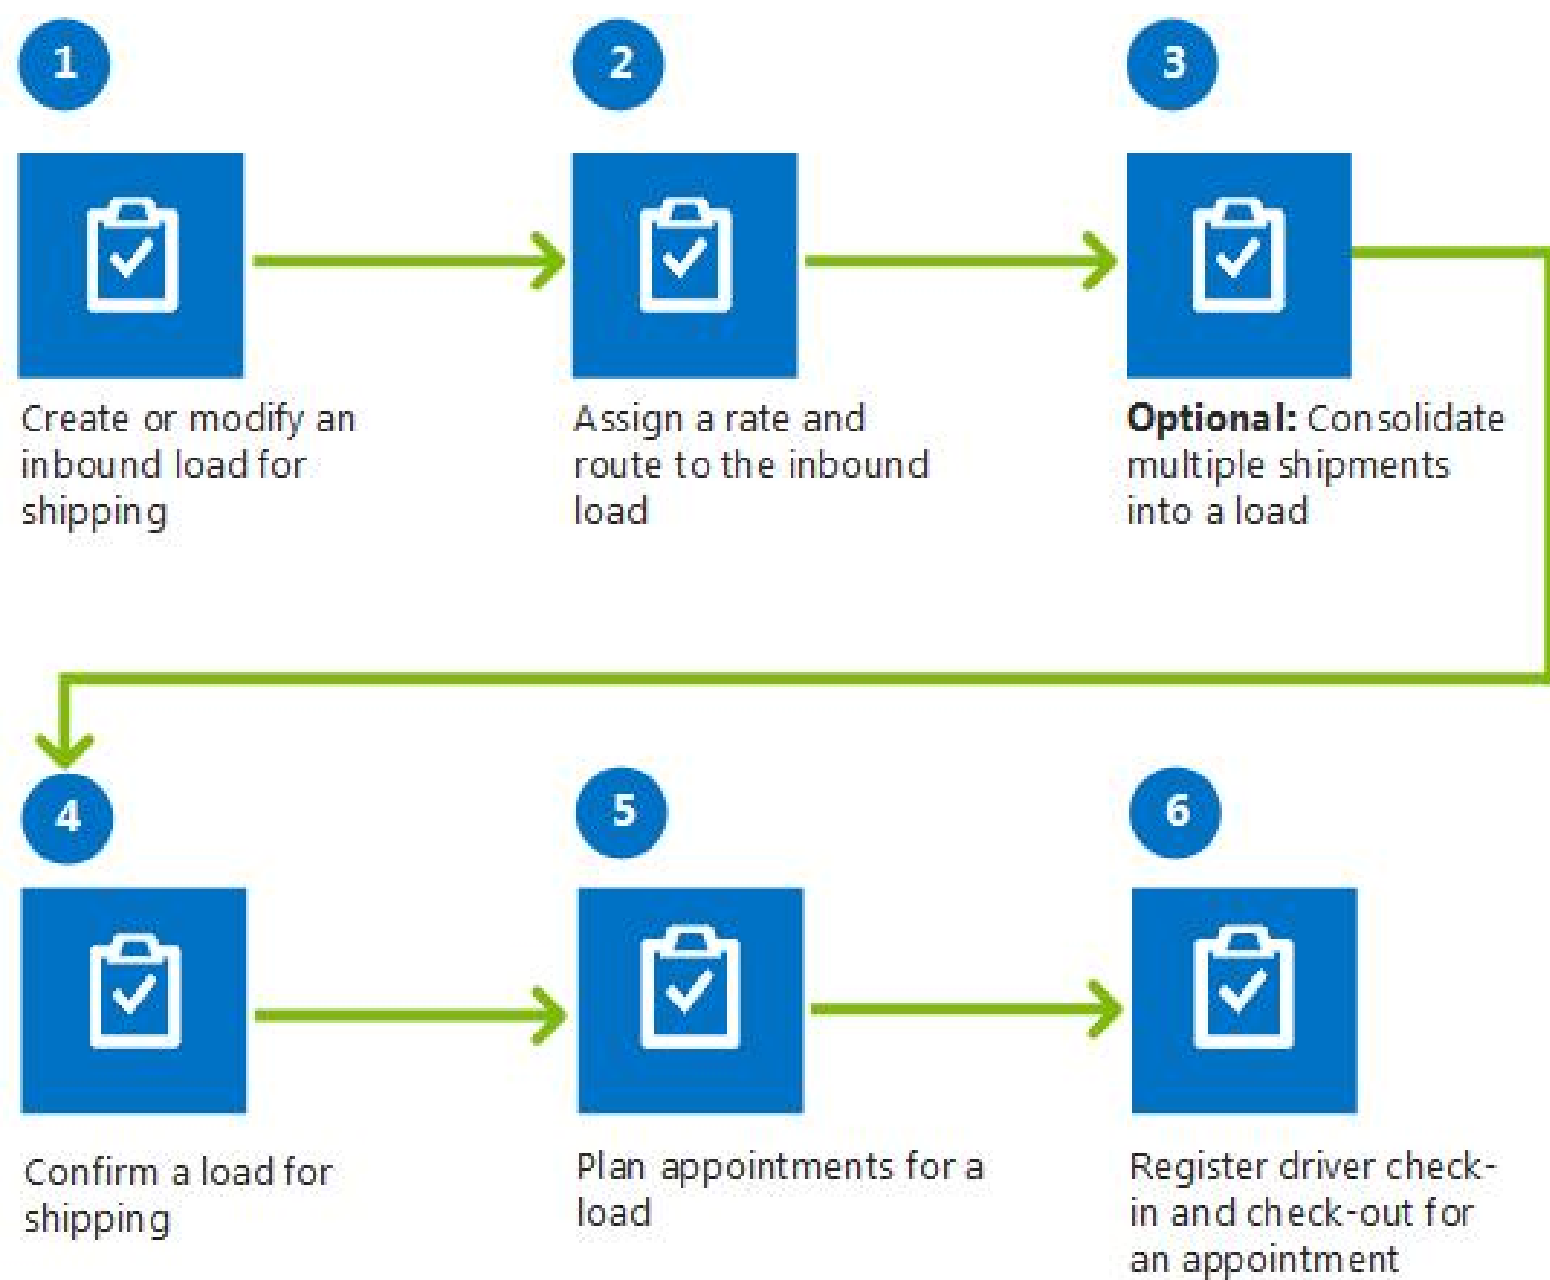

The Customer required :

- Client owned transportation arrangements have not always been the most cost-effective for inbound traffic.
- There was need for outsourcing the management services and at the same time retain control over cost, tracking and billing.

Technology

- **Business Objects**
- **Cliqview**
- **Base/ Legacy systems reporting**
- **Jasper reports etc.**
- **Custom data warehousing solutions on open source platforms**

Detailed Flow

Our Solution

- Designed and implemented a business process integration solution to bridge between the TMS website and base ERP system
- Ensured that base system transaction logging is consistently maintained even with this new application
- Also had to ensure that the current processes of logistics and shipment reporting worked in synch with the TMS vendor processes
- Used Java / MQ/ Message broker in integration with base system. Reused base system components to reduce development cost

Business Benefits Delivered

- Saved up to 25% in transportation management budget
- This model helped customer to keep options open for other third party transportation management services as well
